

CLT94 Type B Dimming Driver

Image	Model No.	Input Power	Input Voltage	Input current	Power Factor	Size of the wire in the module (in.)	Dimmable
	CLT94-100W-DIM	100W	120-277 V	1A	0.9	Input side : White(In-N)-15" Black(IN-L)-15" Green(Ground)-15" Output side: Red(Out+)-8" Black(Out-)-8" Purple(Dim+)-22" Gray(Dim-)-22"	1-10V dimming

*The dimmable function can only be used with the CLT94 Type B tube of Commercial LED.
Please refer to the wiring diagram below.

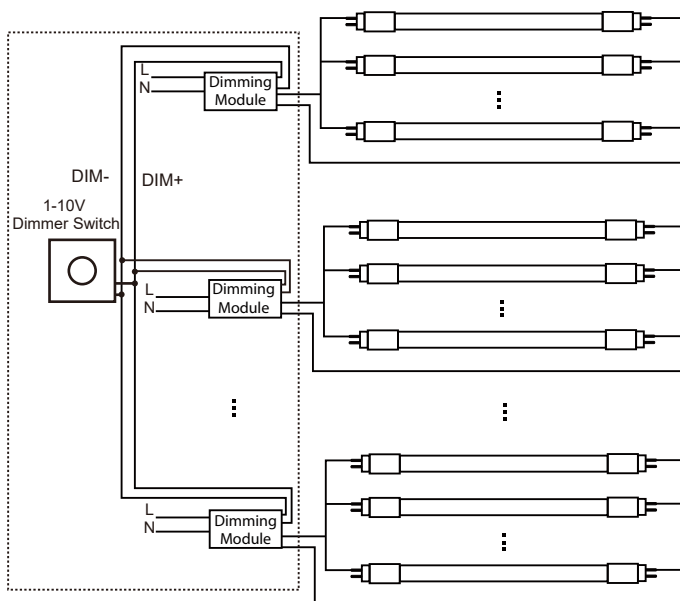

Wire Diagrams

*Load with 1 lamp:

1-10V Dimming Control System
Voltage Input: AC120-277V 50/60Hz

*Load with multiple lamps

1-10V Dimming Control System
Voltage Input: AC120-277V 50/60Hz

Note:

1. The load of dimming module should not exceed 100W, preferably not exceed 80W, otherwise it may damage the dimming module;
2. This dimming module is only suitable for Commercial LED CLT94 Type B Tube;
3. This dimming module match with 0/1-10V dimmers only, Do not use Traic dimmers with this dimming module.
4. Manufacturer is not liable for any damage to product or property due to improper installation. Please refer to the above Installation Instructions for reference.
